

Quick & Reilly Company Alerts Workflow

1a Setting Alerts from Company Pages

AlertPack User Scenarios:

A user has a "new 52 week high" alert set. They click to set a Basic AlertPack, which includes "new 52 week high or low" alert. A dialogue announces:

Setting a **Basic AlertPack** would override the following alerts for **General Electric Co.:**

- "new 52 week high" would become "new 52 week high or low"

Cancel **Continue**

A user has a Basic AlertPack set, which includes "new 52 week high or low" alert. The user clicks to unselect the "new 52 week high or low" alert:

Unselecting this alert will turn your Basic AlertPack into individual alerts. You will no longer see Basic AlertPack selected. Instead, you will set the following individual alerts:

- S&P Star Rating Changes
- In Play news stories
- Earnings Announcements

Cancel **Continue**

2a Setting Alerts from The Alert Center
